Hello,

You should extend the feebate to electric bicycles too. If ebikes were subsidised then i could afford one and could give up my second car. This is beneficial because it is one less car off the road and the bcr of cycling investment is is hugely positive. Ebikes have a much smaller carbon foot print than ecars so this is better for the environment.

I support any submissions from bike auckland and greater auckland.

My views represent a family of four. We would love to be able to afford and electric cargo bike so we can fit both kids in and not have to take a car.

Regards
Chris
