Hi there - please add e-bikes to the feebate scheme, as they're the cleanest cars of all, and have huge potential to replace car journeys of short to medium length for individuals and families. As well as being better for the air we breathe, they deliver health benefits to those who ride them, and unlike e-cars, they actively reduce congestion.

The cleanest car trip is the one you don't have to make, after all :-)

best,

Jolisa
