NOTES

1. The material presented in this section is derived from data provided by the New Zealand Health Information Service, Ministry of Health.
2. The data includes those who, as a result of a motor vehicle crash, were injured seriously enough to be admitted to hospital. (Figures 8 and 9 show data for cyclists who were injured in non-motor vehicle crashes. These casualties are not included in the LTSA's data base which records only motor vehicle crashes). The data base includes only those discharged during the 2003 calendar year.
3. Casualties who are readmitted for further treatment are included only once in the casualty count, but their total stay in hospital is recorded.
