Wellington 6140

Dear Sir/Madam,

I wish to support the submission sent to you by the Aviation Forum regarding the draft Civil Aviation Bill.

More time is needed on many items considered in this bill.

The opportunity exists here for you to take time to achieve an outcome that works well instead of one that could possibly further frustrate this industry.

Initially two points of interest to me are:

The regulatory cost loaded on industry is literally incredible and not affordable. This is working against desired outcomes.

Aviation Security is swamping our regulator and needs to be kept separate.

It appears to me that longer spent on quite a number of issues will be helpful.

Sincerely,
Brett Cullen
