Subject: Environmental effect from Petrol Cars
Date: Wednesday, 31 July 2019 11:27:47 AM

Ministry of Transport

I am writing a petition to introduce Hybrid and Electric cars. The reason being that Petrol cars emit pollution to our environment and to import this commodity is becoming costlier day by day.

The Hybrid cars take less petrol and this will save our foreign exchange. The electric cars give Zero emission and good for environments. The only thing is that the government has to provide power points on the highways including a place in the petrol stations.

In Europe people purchase only Hybrid and Electric cars with reduce duty. India has also slashed duty on Electric cars.

Hope you will do the needful.

Kind Regards

Suraj Narang
