Subject: E- bike inclusion
Date: Tuesday, 20 August 2019 10:19:27 AM

Hello

I believe that this scheme should include e-bikes to reduce their price and make them more affordable to a greater number of people.

The power of e-bikes to transform the emissions landscape is large.

They also:

- reduce petrol consumption
- reduce congestion
- reduce running costs for owners (no warrant, insurance, rego)
- involve some exercise
- increase spending at local shops

Truly a transformational technology for NZ and one for public policy to support.

Regards
Gabriel Gati
