Subject: EV Discount

Hi Julie Anne,

Climate Change affects me, too, so I am considering buying a new Electric Vehicle.

But I have a problem; If I buy now I miss out on a significant discount.

Which makes me wonder if there would be case for Government paying the discount retrospectively, so then I can go ahead and order my new car now, pay the full price, knowing that I will get a refund when you have sorted the details. Win / Win!

Even if you phased it in by degrees; Something, Anything other than as it is which can only hinder EV sales.

And I am sure I am not the only one; more and more people are bound to delay buying as the date gets closer. Who is going to buy a new EV knowing that in a month or two the price will drop significantly?

Over and above that, absolutely you are doing the right thing promoting and encouraging electric vehicle sales.

Thank you!

Cheers!

Chris
