kia ora

thanks for the opportunity to provide some feedback on the clean cars initiative.

I really support the intentions of having a cleaner fleet, and more electric vehicles.

I am only worried about one aspect - the delay in establishing this programme will have a chilling effect on the purchase of EVs. Earlier establishment is my preference.

As I have a current EV, and I am considering buying a new one, the proposal for a rebate programme in 2021 generates a predictable and rational response to wait until then.

I endorse the Clean Cars initiative and I recommend the early establishment of the programme.

Rawiri McKree Jansen
